iOS Developer | Mundio Mobile

Mar 2016 - Feb 2017

- Delivered Swift-based iOS applications from design through deployment.

iOS Application Developer | Unified Infotech Pvt. Ltd.

Oct 2014 - May 2016

- Developed and enhanced mobile applications while managing timelines and quality standards.

Software Developer | CustomerFirst, Indus Net Technologies Group

Mar 2013 - Oct 2014

- Built robust iPhone and iPad applications within project timelines.

PREVIOUS PROJECTS

- **OPHC** | Mar 2026 - Jun 2026: Built the complete iOS application in SwiftUI, using Combine for reactive data flow and state management.
- **Fast Analytics:** Created an iOS traffic-analytics application using the Google Analytics SDK and an intuitive data interface.
- **Looking App:** Built an LGBTQ+ community chat application with API-based messaging and in-app purchases using Objective-C and native iOS SDKs.
- **IBP Instrumental Beats:** Developed a music app that lets users mix voice with instrumentals using Objective-C and native iOS SDKs.
- **PartyGorila:** Created a nightlife discovery and social application with nearby-club search.
- **MyEls:** Developed a platform for discovering colleges and private tutors.

- **ChilliTalk:** Built a VoIP communication application with XMPP-based real-time messaging.
- **AutoAlert:** Implemented car insurance and maintenance reminders with calendar integration.
- **DressCode:** Developed an Objective-C e-commerce platform supporting buyer and seller transactions.
- **Mobi Taxi:** Built client and driver apps with XMPP communication, Google Maps live tracking, and routing.
- **Recyclebin:** Created a recycling-awareness game with leaderboards and UIImage-based animations.
- **Allihal Plus:** Independently delivered a UAE-focused news application from development through completion.
